**Give your old board the chop!**

# Now you can experience the pleasure of a safer working environment, thanks to the unique **profboard**

Distributor:

unique carvery system

## Top sheets are a Top idea

Clicksystem is such a simple solution to a costly and wasteful problem. After a couple of months use most cutting boards have cut and chop marks which provide a great home for bacteria but we are reluctant to throw away a board that is so thick and cost so much. So why not renew the top part, save a fortune and enjoy a safer more hygienic working environment.

## Slip Resistant Feet

The **profboard** also solves another frustrating problem – because old style cutting boards slip around on stainless steel preparation tables we've added specially engineered slip resistant feet so you don't have to use a tea towel to keep the board and it's contents from sliding off the table.
